RESTRICTION

1. Applicant's amendment filed on 12/13/01 has been entered. Claims 1-26 have been canceled. Claims 27-49 have been entered, Claims 27-49 are pending in the application.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 27,29,32,34,35, 38 and 43-44 drawn to polypeptide and a vaccine.

(Further election of invention required. See paragraph # 4).

Group II, claims 28, 30, 31,33,36,37,39,40,41 and 42 drawn to DNA, vector and host cell.

Further election of invention required. See paragraph # 4).

Group III, claims 45 and 49 drawn to an antibody.

(Further election of invention required. See paragraph # 4).

Group IV, claim 46 drawn to a method for inducing an immune response using a polypeptide.

(Further election of invention required. See paragraph # 4).

Group V, claim 47 drawn to a method for diagnosing M.catarrhalis infection using peptide or antibody. (Further election of invention required. See paragraph # 4)

Group VI, claim 48 drawn to a method for inducing immune response using polynucleotide.

Further election of invention required. See paragraph # 4).

3. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1645

Group I is directed to a polypeptide, method for producing the polypeptide and a vaccine, which is the first product. The special technical feature is the polypeptide, which is made up of amino acids. Groups II-III are drawn to structurally different products such as nucleic acids and antibodies which do not require each other for their practice and do not share the same or a corresponding technical feature because they share no common structure, no common property and no common function. The Group IV-V inventions are drawn to methods using the products, which do not require each other for their practice and do not share the same or a corresponding technical feature. Note that PCT Rule 13.2 does not provide for multiple products or methods within a single application. Since the special technical feature of the Group I invention is not present in the Group II-III claims, unity of invention is lacking.

DISTINCT INVENTIONS

4. This application contains claims directed to more than one invention in each group. These inventions are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1 as they share no common structure, no common property and no common function. The inventions are as follows:

SEQ.ID.NOS. 1, 2, 3 or 4

The inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the inventions lack the same or corresponding special technical features for the following reasons: Sequences listed as SEQ.ID.NOS; 1-4 are different to each other and share no common structure, no common property and no common function and thus lack the same or corresponding special technical features.

If applicant elects one SEQ.ID.NO from group II, then applicant is advised to elect the epitopes of that sequence with specific nucleic acid numbers of that sequence but not a generalized formula as recited in claim 40.

Art Unit: 1645

4. Applicant is required, in reply to this action, to elect a group and one sequence and identify the SEQ.ID.NO to which the claims shall be restricted. The reply must also identify the claims readable on the elected invention, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Padmavathi v Baskar whose telephone number is (703) 308-8886. The examiner can normally be reached on M-F (6:30A.M-4: 00 P.M.) First Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynette Smith can be reached on (703) 308-3909.
